## Edit the channel list

What is a bouquet? A bouquet can be thought of something like a folder. Every channel equals a page in this folder and the pages are sorted into categories.

This way you can create a bouquet called “Kids”, for example, under which you “file” all children’s stations. Another example would be to create a bouquet called “Sports“ where you put all sports channels. This way you can create several topic related bouquets.

***Note!***

*You can only delete channels in the “favorites view”!*

You cannot delete the channels in the “All” view. The use of the “All” view is to keep an internal list of all available stations. If you start a new channel search the result would be saved to the “All” view for example. Your favorites bouquet will stay untouched. This way you can easily add newly found channels from the “All” list to your favorites bouquet.
